

DRIP IRRIGATION SYSTEM

Versatile, easy-to-use drip lateral for a wide range of crops. The latest technology integral drip laterals that are economical and suited to Indian conditions

Applications of Drip

Field Crops: **Cotton, Sugarcane**

Horticulture crops: **Bananas, Vineyards, Orchards**

Closed-spaced crops: **Vegetables, Strawberry, Medicinal and Aromatic plants**

Greenhouse irrigation: **Floriculture and Vegetable crops**

Advantage	Features
Quick Spreading.	Proven performance in varying water profiles and varying tracks.
Easy installation and operation.	Non-collapsible dripper lateral tube.
Different dripper spacing available suitable to crop requirement.	Anti-corrosive and resistant –to fertilizers and chemicals.
Uniform discharge of dripper.	Longer life with minimum maintenance.
Unique clog-resistant design.	

Technical Information

Make: LLDPE O.D.: 16 mm

Dripper Discharge: 4 l/h & 8 l/h

Wall thickness: 0.9 mm

Minimum operating pressure: 14 m

Dripper Spacing	Maximum extendable	Lateral Length
	4 l/h	8 l/h
30 cms	43 m	-
50 cms	60 m	-
60 cms	68 m	40 m
70 cms	78 m	48 m
